

### My Correspondence with Government and an Unusual Reply.

“First off, I am a curious **member of the U.S. military** writing you anonymously (personal reasons) and *not in any official capacity. I do not have direct knowledge of anything referenced below, merely the result of general observation and personal speculation, nothing more.*”

“I was raised Catholic and transitioned into a **theistic agnostic** with the “**ruling class**” mindset as described in *God’s Day of Judgement, ...* I never abandoned beliefs in a higher power, an extreme order of design, or a **worldwide flood**. Also, of note, for the better part of a decade I have been of the belief that **we exist in a digital reality.**”

“The information you have presented matches many of my preexisting beliefs and might constitute a classical case of “confirmation bias” using the internet...”

#### Questions Regarding Your Theories:

“Probably a stupid question, but I’m interested in whether there is a difference between the **arrival of the heat wave and the dust shell**. One arrival or two and what would the time difference be?”

“You seem skeptical of **government efforts to build underground**. But with enough underground bases, couldn’t at least a few survive? ... Underground, air pressurized existence could be **the model they are planning around out of perceived necessity**, in which case returning to the surface goes away in favor of hydrogen power cells (or better) and a Matrix-like version of a new Zion.”

### My Correspondence with Government and an Unusual Reply.

“Despite having some idea regarding “good places” to be. It is hard to believe conventional humanity can survive what you describe. Extreme earthquakes, floods, winds, volcanoes, heat, stellar impacts, solar radiation, fast-freezing, thousands of feet of snow and ice, devastation of plant life, food sources, and subsequent famine, years of darkness. These are obstacles that are nearly impossible for normal folks or **most governments today** and even survival within a pyramid for decades on end is an achievement likely to end in failure.”

#### Questions Regarding Your Opinions/Beliefs:

He covered a number of subjects covered in *God’s Day of Judgment* and the videos including free will, higher powers, and the New Testament.

#### My Opinions:

“**Intentional depopulation** in the near term **appears likely**. Much of the underground infrastructure required may already have been constructed. It appears that the true US govt debt may exceed \$91 trillion, which begs a host of questions and makes this belief plausible. Even before COVID, there was Agenda 21 and multiple Executive Orders (ie. EO 13575). I believe that there is a **planned, global movement toward fascism** with the end of **facilitating the carefully orchestrated and significant implosion of global populations** with special emphasis on the **elimination of Kissinger’s “useless eaters.”** Reducing the population and increasing controls will have multiple benefits for its executors: **It facilitates preplanned reduction in human footprint and resource allocation.** Smaller populations to manage with **increased controls over them** make for more nimble and effective work forces, farmers and genetic stock. **Depopulation** efforts also facilitate a timely drawdown of nuclear power plants globally well ahead of **the worst of the seismic disruptions and general population panic.** These drawdown measures preclude the possibility of fallout from a few dozen Fukushima or Chernobyl equivalents **dooming repopulation efforts.**”

### My Correspondence with Government and an Unusual Reply.

“I find it baffling that you suggest we should petition the government for action. Clearly you know that the government is a **battleground between forces both seen and unseen**. Clearly you know that it is an incompetent instrument for the common citizenry.”

“Thus, **the apparent present course of action appears logical. Select segments of the population in secret** while **building hardened infrastructure** under the **auspices of secret preparations for war** against nuclear powers or even aliens, (real or contrived).”

#### Misc. Questions:

“If you are correct about the **scale of this coverup**, it makes little sense that **you are not banned, censored or living with imposed chronic illness or threat of death.** While your YouTube viewership numbers may consist **almost entirely of interested government workers**, it is still open source. I’m guessing you are left to operate due to a lucky combination of obscurity and utility...”

#### In Closing:

“All these questions are basically an invitation to write a book or two in response. Part of me hopes this marks the **beginning of a useful correspondence...**” Regardless, **I look forward to whatever response** your time allows and congratulate you (free will permitting) on an extremely thought-provoking body of work.”
